Chess Test Answers

1. dxe4. The queen is en prise. Take it for free.

2. cxb6. If white takes the pawn on the left, then the pawn can be promoted in two more moves.

3. dxe5. Queens are more valuable than bishops.

4. gxh6. If white takes the pawn on the right, then the pawn can be promoted in two more moves.

5. exf5+. Rooks are more valuable than bishops. The black king is in check.

6. bxa8=♕. White can take the rook and promote to queen. The knight is then pinned and cannot be defended. White gains a queen and captures black's knight and rook.

7. exd5. If white captures the knight, then the bishop e3 forks the king and pawn and the game will be a draw. n capture white's rook.

8. dxe4. White captures the knight and forks the rooks.

9. dxe4. If white captures the knight, then black can capture the knight on b1.

10. dxe. The pawn on e is unguarded.

11. dxe8=♘. This is tricky. If white promotes to a queen, then the game will be pretty even. Both players will have a queen. Black will be able to chase white's king around with the queen. By promoting to knight instead, the queen and king are forked so the king is in check and must move. White captures the queen and is up a knight and a pawn.

12. d8=♕+ or d8=♗+. By promoting to a bishop or queen, the king and queen are forked. Black will have to either capture the promoted piece with the queen or move the king out of the way. If the queen captures, the rook then captures the promoted queen or bishop. If the king moves out of the way, then the promoted piece captures the queen.

13. cxb. White gets a pawn and threatens the rook. There is no way to protect the rook.

14. dxe. Capture the pawn and fork the knights.

15. bxa7. Capture the queen. The bishop must recapture. If it does not, then the pawn can get promoted on a8. But after the bishop recaptures the c pawn can get promoted. The bishop is no longer controlling the c7 square, and c8 is a white square and the bishop is a dark square bishop so c8=♕.

16. cx♞b8=♕. Capture the knight and skewer the king and queen. The king must move out of the way and then ♕xg3.

17. exd+. Capture the pawn, threaten the rook, and the king is in check. The king must move. Pawn captures rook and forks the knights.

Answers to Chess Test continued

18. exf4+ Capture the pawn, threaten the queen and the king is in check. Black must either move the king or put the queen in the way. Putting the queen in the way is best. Rook captures queen, king captures the rook, and white will be able to promote the pawn in four more moves.19. ♖x♜. The black rook is en prise.

20. ♖x♜. The black rook is en prise.

21. ♖x♜. The rook is en prise. Capturing the queen is an illegal move because white would be moving into check from the rook.

22. ♖x♝+. Capture the bishop and fork the king and knight.

23. ♖ax♜h3+. Capture the free rook and put the king in check.

24. ♖x♞+. Capture the knight and fork the king and pawn which was about to be promoted. Capturing the rook on d7 results in black promoting the pawn on h2 to queen.

25. ♖x♜. Both white rooks are attacking the d6 square, but there is only one defender.

26. ♖x♝+. Capture the bishop and fork the other bishop and king.

27. ♖x♕+. Capture the queen and fork the king and knight.

28. ♖xa7. Capture the pawn and put the king in check. The king must go to the 8th rank. Then the rook on h6 can capture the rook on h8 and that is checkmate.

29. ♖ x♜c4 a) …♜ x ♖c4 2) ♖x ♜c4 b) ….♜x♖c7 2) ♖x♜c7.

30. ♖x♝+. Capture the bishop and put the king in check. The king must move to the 8th rank. Then the rook on the h file can go to h8 and that is checkmate.

31. ♖a x ♜+. Capture the rook and place the king in check. ♖x♕ is an illegal move because the white king is in check from the rook on d6. Taking with the rook on a allows the rook on h to capture the queen.

32. ♖xg3+ Capture the pawn and put the king in check. King must go to the h file. The rook on f5 then capture the pawn on h5 and that is checkmate. If …♕g4, 2. ♖x♕ hxg, 3. ♖g5+

33. ♖x♝. Capture the bishop. There are two attackers and only one defender.

34. ♖x♜+. Capture the rook and put the king in check. The king must move to the 8th rank. Then ♖g8#.

35. ♖e x♜+. Capture the rook and put the king in check. Black must either put the queen in the way or move the king to the h file. If the queen blocks, then white just captures it and checkmate is only delayed (…♕g5, ♖x♕, ♚x♖). If the king moves to the h file, then ♖xh1#.

Answers to Chess Test continued

36. ♖x♕+. Capture the queen and put the king in check. Black must either put the bishop in the way of the check or move the king to the a file. If black puts the bishop in the way. Putting the bishop in the way is the better move, but white will be up with two rooks versus one bishop.

37. ♗x♜. The rook is en prise.

38. ♗x♜. The rook is en prise.

39. ♗x♕. The queen is en prise.

40. ♗x♞+. Capture the knight and fork the king and rook.

41. ♗x♜. The rook is en prise.

42. ♗x♕. The queen is en prise.

43. ♗x♕. The queen is en prise.

44. ♗xd5+. Capture the pawn and fork the king and rook.

45. ♗xb7. Capture the pawn and the rook is trapped.

46. ♗x♕+. Capture the queen and put the king in check. King has to take the bishop and ♝x♖.

47. ♗x♜+ Capture the rook first. Then the king is in check. Black will recapture the bishop. And white can then take the knight. If white takes the knight first, then black can move the rook out of harm's way.

48. ♗xg5+. Capture the pawn and put the king in check. The king must move and then white can capture the queen. If white takes the queen first, black can capture the dark square bishop and put the king in check. The game will be a draw because a bishop alone is not enough material for checkmate.

49. ♗xe5+ Capture the pawn and put the king in check. Black must either move the king to g8 or put the bishop in the way. If Kg8 then ♗xd5#. If bishop in the way, then hxg7+ then the h pawn captures the bishop and the king has to go to g8. And again ♗xd5#.

50. ♗xg4+. Capture the pawn and fork the king and rook.

51. ♗xe5. Capture the pawn and fork the king and queen.

52. ♗xd4+ Capture the pawn and put the king in check. The king must either move to g8 or put the knight in the way. If the knight is in the way, it is en prise. If Kg8 then ♗xd5#

53. ♗xd5+ Capture the pawn and fork the king and queen and white has a winning position.

54. bxe4+. Capture the bishop and fork the king and queen and white has a winning position.

Answers to Chess Test continued

55. ♔xe4. Capture the queen and then promote the pawn.

56. ♔xf2. Capture the queen and white has a winning position.

57. ♔x♜c4. Capture the rook.

58. ♔x♝. Capture the bishop. It is controlling the a7 square. After the capture the pawn on the a file can be promoted in two more moves.

59. ♔x♞. Capture the knight. Then the pawn can get promoted. If black capture the bishop, then the knight can move to c6 and control the a7 square which stops the promotion.

60. ♔x♜g2. Capture the rook that is threatening the pawn on the g file which can then promote. If …♜e1, ♔f2 and then the pawn can get promoted.

61. ♔g2. Prevent the h pawn from promoting. Then the pawn on the a file can promote in two moves.

62. ♔xe2. Capture the e pawn before it promotes. Then the pawn on the a file can promote in two moves.

63. ♔x♝. Take the free bishop and attack pawn on g7.

64. ♔xd5. Capture the pawn and threaten both knights. White can move the knight on e out of the way, but white can capture the knight on d6 because two pieces are threatening it and only the king is defending it.

65. ♔d3. Fork the knight and bishop.

66. ♔d4. Fork the knights.

67. ♔f4. Attack the bishop and put the king in discovered check from the rook on e1.

68. ♔d5. Attack the rook and put the king in discovered check from the rook on a4.

69. ♔g6. Attack the rook and put the king discovered check from the rook on f8.

70. ♔b3. Threaten the rook and set up mate with the rook on the c file coming down to c1. Black can only delay this mate with a rook move.

71. Kxe3+. Capture the pawn and skewer the king and queen. Then ♔xg7 and white will also be able to win the other rook.

72. Kx♜+. Capture the rook and put the king in discovered check from the bishop.

73. ♕x♕. Capture the free queen.

74. ♕x♕. Capture the free queen.

75. ♕x♕. Capture the free queen.

Answers to Chess Test continued

76. ♕xg6+. Capture the free pawn and skewer the king and queen.

77. ♕x♗+. Capture the free bishop and fork the king and rook. If white captures the rook first, then the bishop captures the queen and black will win.

78. ♕x♖+. Capture the free rook and fork the king and the other rook.

79. ♕x♗+. Capture the free bishop and fork the king and rook. Capturing the knight is a good move too, but capturing the bishop is better.

80. ♕x♗+. Capture the free bishop. Skewer the king and queen.

81. ♕x♞a4+. Capture the knight and fork the king and the other knight. Capturing the knight on c4 is a good move, but the capture on a4 is better. Because of the check and getting both knights.

82. ♕d8+. Fork the king and rook.

83. ♕x♞+. Capture the free knight and fork the king and the rook on b8.

84. ♕xd6+. Capture the pawn and put the king in check. The king must move to c8 or e8. Whichever one it moves to then the queen can capture the knight in front of the king and it will be checkmate.

85. ♕xf6+. Capture the free pawn and fork the knights. The king has to move out of check. Wherever it goes, capture a knight for the knight and king.

86. ♕xc6+. Capture the free pawn and fork the knights. The king has to move out of check. Wherever it goes, fork the king and rook.

87. ♕d8+. Fork the queen and king.

88. ♕e6+ or ♕xe7. The e6 move puts the king in check. Black's only move is ♚f8. Then ♕f7#. The capture on e7 leaves black with no good moves as white has mate with ♕f7# and black can only delay the mate by putting the king in check. If …♕d4 2. ♕f7+ ♚h8 3. ♕h7#

89. ♕a8+. Skewer the king and queen.

90. ♕a8+. Skewer the king and queen.

91. ♘xe6+. Capture the pawn and fork the king and queen.

92. ♘x♕+. Capture the queen and put the king in check.

93. ♘x♕. Take the free queen.

94. ♘x♞+. Fork the king and queen.

95. ♘xh4+. Fork the king and queen.

Answers to Chess Test continued

96. ♘x♕+. Capture the free queen and put the king in check. Taking the rook is also a good move, but this is better. The queen is more valuable, and black has to respond to the check. 1) ♘x♕ ♗x ♘ 2) ♖x♜ and white has the advantage.

97. ♘xe6+. Take the free rook and fork the king and queen. The king must move, then take the free queen.

98. ♘x♞+. Capture the knight. If black recaptures, then the king can recapture the black knight.

99. ♘xf7+. Capture the free pawn and fork the king and rook.

100. ♘f7#. Checkmate the king with the knight. This is a smother mate.

101. ♘cxd6+ or ♘exde6+. Fork the king and queen. Then … ♞xd6. But then ♘cxd6+ or ♘exde6+ (whichever one was not used the first move). There is now no defense to the fork and white wins the queen.

102. ♘xd5#. Capture the pawn and checkmate the king.

103. ♘b (or ♘e) xd5+. This forks the king and queen. Black recaptures with the knight and white recaptures to create the same fork.

104. ♘xf7. Take the pawn. The king cannot take back because of the bishop. On the next move white can capture the rook with the knight.

105. ♘c4+. Fork the king and queen.

106. ♘g5+. Fork the king and rook.

107. ♘e4+. Fork the king and rook. Also, when the rook is captured then the knight is also controlling the h1 square. This means if black promotes the h pawn, white can capture on h1.

108. ♘cx♜+ or ♘ex♜+. Capture the rook with a knight. This forks the king and rook. Black will recapture with the pawn. Then the other knight captures the pawn, again forking the king and rook.

109. ♖d8#. The king protects a7, b7, c7. Moving the rook to the 8th rank puts the king in checkmate by threatening it and taking away a8 and c8.

110. ♖g8#. The king protects a7 and b7. The rook move puts the king in checkmate by threatening it and taking away b8.

111. ♖h1#. The king protects g2, g3, and g4. The rook move puts the king in checkmate by threatening it and taking away h2 and h4.

112. ♖a5#. The king is controlling b6 and b7. The rook move puts the king in checkmate by threatening it and taking away a6 and a8.

Answers to Chess Test continued

113. ♖h1#. The rook on g controls the whole g file. The move rook to h1 puts the king checkmate by threatening it and taking away the whole h file.

114. ♖hb2#. The rook on a controls the whole a file. The king protects the three squares c3, c4, c5 that the king could go to. ♖b2 puts the king by taking away b3 and b5. Capturing the queen with ♖xh5 is not as good. Black recaptures with ♜xh5. The material is equal, and the game should be a draw.

115. ♖d8#. The king cannot capture the rook on h7 because the king would be moving into check from the bishop on c2. The rook on h7 protects g7 and f7. ♖d8 puts the king in checkmate.

116. Kg2#. With the king out of the way of the rook on the h file, the king is in check. It cannot go to h7 because of the same rook. The king cannot go to the g file because of the rook on g3. 117. Kb2#. With the king out of the way of the rook on a1, the king is threatened. It cannot go to a5 or a7 because of the same rook. It cannot go to the b file because of the rook on b8.

118. g7#. The king is threatened by the pawn, which it cannot take because of the other pawn. It cannot go to h7 because of the bishop on d3.

119. g3#. The king is in check from the pawn move. The king cannot capture the g pawn because it would be moving into check from the h pawn. It cannot go to g4 because of the f pawn. It cannot go to h3 because of the bishop.

120. c4#. Moving the pawn puts the king in checkmate from the bishop. The king cannot go to g7 because of the bishop.

121. a8=♕# or a8=♖#. Promote the pawn to queen or rook. It puts the king in checkmate by threatening it and taking away c8 and e8. The rook on h7 is controlling the whole 7th rank.

122. axb#. With the pawn out of the way, the king is threatened by the rook on a1. That same rook also protects a7. The rook on b5 protects b7 and b8.

123. cxb8=♕#. Capture the knight with the pawn and promote the pawn to a queen. The king cannot capture the queen because of the bishop on g3. The queen also protects a7 and b7.

124. f8=♘#. Here is one of those rare times when it is better to promote to a knight. The king is attacked by the knight and cannot go to g6 because of the knight.

125. cx♜=♕# or cx♜=♖#. Capture the rook and promote to queen or rook. It puts the king in checkmate by taking away g8. The rook on d7 protects g7 and h7.

126. fx♞=♕#. Capture the knight and promote to queen. It puts the king in checkmate by taking away h8. The king cannot capture the queen because of the knight on e7. Th king cannot go to g6 because the knight protects that square.

127. ♕b7#. The queen puts the king in checkmate by threatening it and taking away all the squares it could move to. The king cannot capture the queen because the black king would be moving into check with the white king.

Answers to Chess Test continued

128. ♕f7#. The queen puts the king in checkmate by threatening it and taking away all the squares it could move to. The king cannot capture the queen because the black king would be moving into check with the white king.

129. ♕g7#. The queen puts the king in checkmate by threatening it and taking away all the squares it could move to. The king cannot capture the queen because the black king would be moving into check with the white king.

130. ♕g4#. The queen puts the king in checkmate by threatening it and taking away all the squares it could move to. The king cannot capture the queen because the black king would be moving into check with the white king.

131. ♕b4#. The queen puts the king in checkmate by threatening it and taking away all the squares it could move to. The king cannot capture the queen because the black king would be moving into check with the white king.

132. ♕h1#. The queen puts the king in checkmate by threatening it and taking away all the squares it could move to. The king cannot capture the queen because the black king would be moving into check with the white king.

133. ♕a8#. The king is controlling d7, e7, and f7. Putting the queen on a8 puts the king in checkmate by threatening it and taking away d8. ♕e7+ does not work because of ♞xe7.

134. ♕a8#. The king is controlling b3, b4, and b5. Putting the queen on a8 puts the king in checkmate by threatening it and taking away a5.

135. ♕x♕#. The queen puts the king in checkmate by threatening it and taking away g8 and h7. The king cannot capture the queen because of the knight on h5.

136. ♘b6#. The king is controlling a7 and b7. The knight move puts the king in checkmate.

137. ♘f7#. This is a smother mate. Nothing can take the knight. The king has nowhere to go.

138. ♘f7#. The king is threatened by the knight. The king protects g7 and h7.

139. ♘c4#. The king cannot go to b2 or a2 because of the rook. It cannot go to b2, b3, or b4 because of the king. The knight move puts the king in checkmate.

140. ♘c2#. The king protects a2 and b2. The knight move threatens the king and takes away b4.

141. ♘f7#. The king is controlling g7 and h7. The knight on e7 is controlling g8. The knight move to f7 puts the king in checkmate.

142. ♘f6#. The knight on g6 is controlling f8 and h8. ♘f6 puts the king in checkmate. ♘h6+ does not work because of black's response of ♞xh6.

143. c8=♘#. Advance the pawn and turn it into a knight. That move puts the king in checkmate and takes away b6. This is one of those rare times where it is not correct to promote a pawn to a queen.

Answers to Chess Test continued

144. dxc8=♘#. Capture the bishop and turn it into a knight. This puts the king in checkmate. The king is controlling a6 and b6.

145. ♕xf7#. The queen puts the king in checkmate by threatening it and taking away all of its escape squares. The king cannot capture the queen because of the bishop on c4.

146. ♕xh7#. The queen puts the king in checkmate by threatening it and taking away all of its escape squares. The king cannot capture the queen because of the bishop on c2.

147. ♕xg7#. The queen puts the king in checkmate by threatening it and taking away all of its escape squares. The king cannot capture the queen because of the rook on g1.

148. ♕xh7#. The queen puts the king in checkmate by threatening it and taking away all of its escape squares. The king cannot capture the queen because of the rook on h1.

149. ♕xb7#. The queen puts the king in checkmate by threatening it and taking away all of its escape squares. The king cannot capture the queen because of the bishop on g1.

150. ♕xa7#. The queen puts the king in checkmate by threatening it and taking away all of its escape squares. The king cannot capture the queen because of the rook on a1.

151. ♕f7#. The queen puts the king in checkmate by threatening it and taking away all of its escape squares. The king cannot capture the queen because of the bishop on b3.

152. ♕a8#. The queen puts the king in checkmate by threatening it and taking away all of its escape squares. The king cannot capture the queen because of the bishop on g2.

153. ♕xh7#. The queen puts the king in checkmate by threatening it and taking away all of its escape squares. The king cannot capture the queen because of the knight on g5.

154. ♖h1#. The king is controlling g5, g6, and g7. The rook move puts the king in checkmate by threatening it and taking away all the other squares on the h file.

155. ♕e7#. The queen puts the king in checkmate by threatening it and taking away all of its escape squares. The king cannot capture the queen because of the king. ♕h8+ does not work because the black queen can capture on h8.

156. g7#. The pawn puts the king in checkmate. The king cannot capture the pawn because of the knight.

157. ♖g8#. The rook on h7 is controlling the whole 7th rank. Moving the rook to the 8th rank puts the king in checkmate by taking away the whole rank.

158. ♗f5#. The king is controlling b7, the pawn on c7 and d7. The bishop move attacks the king.

159. ♘d6#. The pawn is controlling d8 and f8. The king is controlling the pawn and d7 and f7. The knight move attacks the king. ♘f6+ does not work because the black pawn can capture.

160. ♗x♜#. Capturing the rook takes the white king out of check and puts the black king in checkmate. The pawn is controlling b8 and d8. The king is controlling the pawn and b7 and d7.

Answers to Chess Test continued

161. ♘d3#. The king is controlling d1 and d2. The knight move puts the king in checkmate by taking away f2.

162. ♗c3#. The move attacks the king. The other bishop protects g8. The king protects h7.

163. ♕e5#. The queen puts the king in checkmate by taking away all of its escape squares. The king cannot capture the queen because of the king.

164. ♕e3#. The queen puts the king in checkmate by taking away all of its escape squares. The king cannot capture the queen because of the bishop on h6.

165. ♕d6#. The queen puts the king in checkmate by taking away all of its escape squares. The king cannot capture the queen because of the king.

166. ♕a1#. The queen puts the king in checkmate by taking away all of its escape squares. The king cannot capture the queen because of the bishop on g7.

167. ♕xg2#. The queen puts the king in checkmate by taking away all of its escape squares. The king cannot capture the queen because of the bishop on b7.

168. ♕g2#. The queen puts the king in checkmate by taking away all of its escape squares. The king cannot capture the queen because of the pawn.

169. ♖f1#. The rook on c2 is controlling g2 and h2. The rook move puts the king in checkmate by taking away g1.

170. ♖b8#. The rook move puts the king in checkmate by taking away b2.

171. ♖a8#. The move puts the king in checkmate by taking away a1 and a3. The bishop is controlling b2.

172. ♗c8# or ♗d3#. The king is controlling b5, b6, and b7.

173. ♗xf6#. The bishop puts the king in checkmate by taking away g7.

174. c4#. Moving the pawn creates a discovered check from the bishop on d2. The pawn on b3 protects a4. The pawn on c protects b5. The knight protects b4 and b6.

175. ♖a1#. The rook puts the king in checkmate by taking away the whole a file. Black cannot move the bishop to a5 to block the check because black would be moving into check from the bishop on e3. The bishop on g2 protects b7 and a8.

176. ♘d6#. The pawn cannot capture the knight because the king would be moving into check from the rook on e1. ♘f6+ does not work because the knight on g8 can capture.

177. ♘f7#. Smother mate. The king has no escape squares, and nothing can capture the knight.

178. ♘c2#. The king protects b1 and b2. The knight move attacks the king.

179. f7#. The pawn attack the king. The king cannot capture the pawn because of the rook on f1.

Answers to Chess Test continued

180. e5#. The pawn on c protects b5 and d5. Moving the e pawn up creates a discovered attack on the king from the bishop on g2. That bishop also takes away b7. The e pawn protects d6.

181. ♘g3#. The king protects g1 and g2. The knight attacks the king.

182. b4#. The pawn attacks the king. The king cannot capture the pawn because it would be moving into check from the king. The white king protects b4 and b5. The bishop protects b6.

183. exf7#. The king is attacked by the pawn. The king cannot capture the pawn because of the rook on f1.

184. ♖c7#. The rook threatens the king and takes away a7, c6 and c8. The king cannot capture the rook because of the pawn on b6. The king cannot capture the pawn because of the bishop on e3.

185. ♖xa5#. The rook attacks the king and takes away the whole a file. The rook on b2 protects b6 and b7.

186. O-O#.

187. ♖xh7#. The rook attacks the king. The black king cannot capture the rook because of the knight on f6. The knight also protects g8. The rook also protects g7.

188. ♖h8#. The rook puts the king in checkmate by taking away h6. The king cannot capture the rook because of the rook on a8. The knight on f4 protects g6.

189. ♖a8#. The rook puts the king in checkmate by taking away c8 and a7. The king cannot capture the rook because of the bishop on g2.

190. ♖f8#. The rook puts the king in checkmate by taking away h8. The bishop protects the rook and g7.

191. ♗a6+.This is the one that is not mate in one. Moving the bishop creates a discovered check from the rook on h8. But black can block with bishop to e8; then ♖x♝#

192. ♖x♝#. The rook puts the king in checkmate by taking away a8. The king cannot capture the rook because of the bishop on a6. The bishop also protects b7.

193. bxa7+ double check. Moving the pawn creates a discovered attack on the king from the rook on b1 as well as check from the pawn. The rook protects the entire b file. Black cannot capture the pawn with the king because of the bishop on f2.

194. ♖d8#. The rook puts the king in checkmate by taking away the entire 8th rank. The king cannot capture the rook because it would be moving into check from the bishop on h4.

195. ♗d8#. The king is threatened by the bishop. The bishop also protects b6. The rook on d1 protects the entire d file. ♗d3 does not work because then the king can escape to b3

196. ♖a8#. The knight protects b7 and d7. The rook puts the king in checkmate by taking away b8.

Answers to Chess Test continued

197. ♕xf7#. The queen captures the pawn. This move puts the king in checkmate by taking away all of black's escape squares. The black king cannot capture the queen because it is protected by the bishop on b3.

198. ♘g5#. The knight on f5 is controlling g7 and h6. The knight move attacks the king.

199. ♘c5#. Moving the knight creates a discovered checkmate from the rook on e1. The rook also protects e7. The knight protects d7. ♘g7+ and ♘c7+ do not work because the king can escape to d7.

Answers to Chess Test continued

200. ♗xd4#. The bishop on b3 protects g8. Capturing the pawn puts the king in checkmate from the bishop. The bishop attacks g7.

201. ♗e4#. The bishop on c3 attacks g7. The bishop move puts the king in checkmate. The bishop protects c6.

202. ♗a6#. The bishop move puts the king in checkmate by taking away b7. The bishop on f4 attacks c7 and b8.

203. ♗a4#. The king is attacked by the bishop. The other bishop attacks e7 and f8. Black cannot put the queen in the way of the check with ♕d7 because of moving into check from the white queen.

204. ♗xc7#. The bishop on a6 is controlling b7 and c8. The b pawn is controlling a7. The bishop move puts the king in checkmate. The black king cannot capture the bishop because of moving into check from the b pawn. bxc+ does not work because the king can escape to a7.

205. axb#. Moving the pawn creates a discovered checkmate from the rook on a1. The rook attacks the whole a file. The bishop on g3 controls b8. Black cannot block the check with ♞a5 because of moving into check from the bishop on f3.

206. ♘d5#. The knight on e5 is controlling d7 and f7. The knight move creates a threat on the king and attacks f6.

207. ♘e6#. The king attacks e7 and e8. The knight on b6 protects c8 and d7. The knight move puts the king in checkmate by taking away c7.

208. ♘h6#. The bishop on c3 is controlling g7 and h8. The knight move attacks the king. ♘f6 does not work because the bishop is no longer controlling g7 and h8.

209. ♘e6#. Moving the knight creates a discovered attack on the king from the bishop on b2 and a double check from the bishop and the knight. The h pawn is controlling g6. The bishop attacks f6 and h8.

210. ♘c7#. The bishop attacks e7 and d8. The knight move attacks the king. ♖e1+ does not work because black can put the bishop in the way.

211. ♕xh7#. The queen takes away h8 and attacks the king. The king cannot capture the queen because of moving into check from the knight on g5.

Answers to Chess Test continued

212. ♕h8#. The queen puts the king in checkmate by taking away all of the king's escape squares. The king cannot capture the queen because of the bishop on b2.

213. ♕xf7#. The queen puts the king in checkmate by taking away e7 and e8. The king cannot capture the queen because of the bishop on b3.

214. d8=♕#. White promotes the pawn to a queen. The queen puts the king in checkmate by taking away all of the king's escape squares. Black cannot capture the queen because of the bishop on h4.

215. ♗d4#. The bishop move blocks the queen from taking the rook.

216. ♕xd7#. The knight on e5 is controlling f7 and protects the queen when it captures. The queen puts the king in checkmate by taking away d8.

217. White: ♖e8#. Back rank checkmate. The rook takes away the whole 8th rank. Black has nothing to put in the way. The king has no escape routes. Black: ♕xh2. The king is in check from the queen, which is protected by the bishop in d6.

218. White: ♖xg7#. The rook puts the king in checkmate by taking away the whole 7th rank. Black cannot capture the rook because of the other rook. Black: ♗xe3#. The king is in check from the bishop and the rooks control the f1, f2, h1, and h2.

219.White: ♕xg7#. The queen attacks the king and protects h8. The knight on f5 protects the queen. Black: ♕xa2#. The king is attacked by the queen, which is protected by the bishop on e6.

220. White: ♘e2#. This is the only way white has to attack the king. The king controls f2 and h2 and the g2 pawn. The g pawn protects f3. The e pawn protects f4. The h pawn protects g4. Black: ♕xe3#. The queen attacks the king. The queen cannot be taken by white.

221. White: ♘c2#. This is the only way for white to attack the black king. The king defends the a pawn and b2. The a pawn defends the b pawn. The b pawn defends a4. The knight move also takes away b4. Black: ♕b2#. The king is attacked by the queen, which is protected by the king.

222.White: h8=♕#. The queen move puts the king in checkmate by taking away the entire 8th rank and g7. The king controls e7 and f7. Black: ♕e7#. The king is checkmated by the queen, which controls all the squares the king could move to, and the queen is protected by the black king.

223. White: h8=♕#. Promoting the pawn to queen puts the king in checkmate by taking away the whole 8th rank as well as g7. The king protects e7, f7, and g7. Black: ♗e7#. The king is checkmated by the bishop, which also controls g5. The king protects the bishop, and the king and light square bishop take away all the other escape squares.

224. White: ♖x♜d8#. The knight con f7. The capture creates an attack on the king and takes away f8. Black: ♜x♖#. The king is attacked by the rook which is protected by the bishop on g4.

225. White: ♗c3#. Moving the bishop creates a discovered checkmate from the rook on g3. The bishop protects h8. The bishop also blocks the queen from taking the rook. Black: ♕d1#. The king is checkmated by the queen, which is also controlling all escape squares.

Answers to Chess Test continued

226. e3+ forks the king and rook.

227. e5 forks the bishop and knight.

228. fxg+ forks the king and rook.

229. e4+ forks the king and rook.

230. g4 forks the rook and knight

231. dxc4+ forks the king and queen. The bishop protects the pawn against capture.

232. c7+ forks the king and queen.

233. f8=♕+ or f8=♖+ forks the king and queen.

234. ex♗=♕+ forks the queen and king.

235. ♖f7+ forks the king and bishop.

236. ♖g2+ forks the king and knight.

237. ♖f7+ forks the king and queen.

238. ♖xf7+ forks the king and bishop. If… ke8, then ♖x♗, forking the knights.

239. ♖xe7+ forks the king and queen.

240. ♖d8+ forks the king and queen.

241. ♖h4 forks the rook and knight. If … ♜xh4 then ♖x♜+, forking king and knight.

242. ♖x♜+ forks the queen and king

243. ♖xg6 forks the king and queen. When ♕ x ♖then fxg and fork the knights.

244. ♗d4+ forks the king and queen.

245. ♗xe4+ forks the king and rook.

246. ♗xf6+ forks the king and rook.

247. ♗xe3+ forks the king and rook.

248. ♗xd4+ forks the king and queen.

249. ♗c5+ forks the rook and king.

250. ♗xb7+ forks the king and rook.

251. ♗xg5+ forks the king and rook.

252. ♗xf6 forks the queen and rook. It is better to fork with the bishop instead of the queen since the bishop is less valuable than the queen.

Answers to Chess Test continued

253. ♘xf5+ forks the king and queen.

254. ♘xd5+ forks the king, queen, and rook.

255. ♘d5+ forks the king and bishop.

256. ♘ce6+ or ♘fe6+. Either knight move forks the king and queen. The f pawn will capture, and then the other knight will recapture and again fork the king and queen.

257. ♘exf6+ or ♘gxf6+. Either knight move forks the king and queen. The bishop will capture, and then the other knight will recapture and again fork the king and queen.

258. ♘xc6+. Black's only move is Kb7. The bishop on h3 is controlling c8. Now both the king and queen are on white squares. ♘a5+ forks the king and queen.

259. ♘ed6+ or ♘fd6+ forks the king and rook. The black knight can capture the first knight. Then the other white knight can recapture.

260. ♘x♞+ forks the king and queen. After pawn captures knight then ♗xe6+, forking king and queen.

261. ♕x♜+. Then ♚x♖ and ♘d6 forks the queen and king.

262. ♕xf7+ forks the king and rook

263. ♕d8+ forks the king and rook.

264. ♕d8+ forks the king and rook.

265. ♕d4+ forks the king and rook.

266. ♕h4+ forks the king and rook on e1.

267. ♕g7+ forks the king and rook.

268. ♕f7+. Fork the king, rook, and knight. ♚h6 ♕x♜ forking the king and knight. ♚g7. ♕x♞, forking the bishop and king. ♚g8 ♕x♝

269. ♕x♞+ forks the king and rook. (…Ke8, 2. ♕xb8+ forking king and rook. 2…Kd7. 3. ♕x♜)

270. ♕xh4+ forks the king and bishop (…Ke8 or Kd7. 2. ♕x♝+ forking king and rook. 2…Ke7. 3. ♕x♜).

271. ♖d2 pins the bishop to the king.

272. ♖h5 pins the knight to the king.

273. ♗h4 pins the rook to the king.

274. ♗c2 pins the rook to the king.

275. ♕f4 pins the rook to the king.

Answers to Chess Test continued

276. ♕h4 pins the rook to the king.

277. ♕h1 pins the rook to the king.

278. ♕g4 pins the knight to the king.

279. ♕h8 pins the bishop to the king.

280. d3. The knight cannot move because it is pinned by the rook.

281. f4. The knight cannot move because it is pinned by the bishop.

282. e4. The knight cannot move because it is pinned by the rook.

283. f4. The bishop cannot move because it is pinned by the rook.

284. c4. The rook cannot move because it is pinned by the queen.

285. ♗b4. The knight is pinned by the queen and attacked by the queen. If …c5, ♗xc5.

286. f4. The knight cannot move because it is pinned by the rook.

287. c5. The knight cannot move because it is pinned by the rook.

288. e4. The rook cannot move because it is pinned by the bishop.

289. ♖h8+ skewers the king and rook.

290. ♖h7+ skewers the king and queen.

291. ♗d4+ skewers the king and queen.

292. ♕h8+ skewers the king and queen.

293. ♗xc7+ skewers the king and queen.

294. ♖x♜+ skewers the king and queen and forks the rook and king. Black will recapture with the rook. then the other rook recaptures to skewer the king and queen.

295. ♖x♜+ skewers the king and queen. The king can recapture, but then ♖h8+ skewers the king and queen.

296. ♖x♜+ skewers the king and rook. The king can recapture, but then ♖h2+ skewers the king and rook.

297. ♗x♝+ skewers the king and queen. The king can capture, but then ♕a1+ skewers the king and queen.

298. a6. If black captures with bxa then bxa and white will be able to promote in two more moves.

299. h5. If black captures with gxh then gxh and white will be able to promote in three more moves.

300. ♗x♝. If black captures with the pawn, white can promote in three moves. If black does not capture, then ♗xh6 and it is a winning position.

Answers to Chess Test continued

301. ♗xg6. If the pawn captures, white can promote in two moves. If not, then white is the only player with a piece left and should have no trouble winning.

302. bxa. The pawn will promote in two moves. The knight cannot stop the pawn from promoting to queen. bxc does not work because the knight can block the pawn promotion in two moves.

303. c6. If bxa, cxb and promotes on the next move. If bxc, a6, and the a pawn promotes in two more moves.

304. ♕x♜+. King recaptures. Then a8=♕+.

305. ♖a8. This threatens rxf8+, king takes and pawn promotes. If black goes rxa8, then bxr8=♕+.

306. ♖e8+ and forking the king and rook. If ♖xe8, dxe8=♕+.
